

Fern Park Master Plan Meeting
Notes from 12/14/2017

Present: Adele Burnett, Ray Kopp, Ted Christodaro, Mitch Lee, Aimee VanWie, Tim Brownsell, Lynn Durkin

Both Ted and Ray reviewed documents they have created to help move the process forward. Ted created a document that pulled the recreation segment from the original Town Master Plan, a redesigned version for the document that Mitch had put out outlining the Fern Park assets and a summary of what was talked about at previous meetings. These documents will be available @ TownofInlet.org were these meeting minutes are posted.

Ray put forward a document outlining how he sees the process working.
ACTION: Ray will update his document to reflect the discussions it generated.

These documents were very useful in guiding the discussion during the meeting. Much of the discussion was around defining who the stakeholders are and what they want for the future of the park. In addition to the stakeholders we previously identified we refined "visitors" to include guests of the hotels, motels and cottages. We also want to reach out to people who haven't been here before and also those who plan special events.

ACTION: Get going on a survey. This will be addressed further at the next meeting.

Grants from both BFC and Cycle ADK were discussed. It was decided that both organizations would benefit from improved electrical and water hookups at the park.

ACTION: Mitch was asked to provide a rough estimate for both. He subsequently provided an estimate of roughly \$1200 to do an outdoor water hookup and fountain and \$3600 to do a "carnival" hookup for the electrical.

We believe that GPS of the existing trails has been done by Mike Bartolotti.

ACTION: Mitch will contact Mike.

The next meeting is January 16 at 7:00 in the town hall.
